

Developed and manufactured in our own factory. Product quality assured. You have to see it to believe it!

Ask your favorite vendor to let you "not see" inside the Dark Room enter and close the zip.

Use of light reflective material to increase the light intensity within the enclosure (PCT patent pending).

Comes with support tubes capable of carrying equipment load up to a total of 30Kg for filter, lighting system and extraction...

Assembly is quick and easy, even the large sizes can be assembled in minutes by one person alone.

The material is washable both on the inside and outside, removing all odours.

Material is light weight and the product compact even the big sizes can be carried and stored with ease.

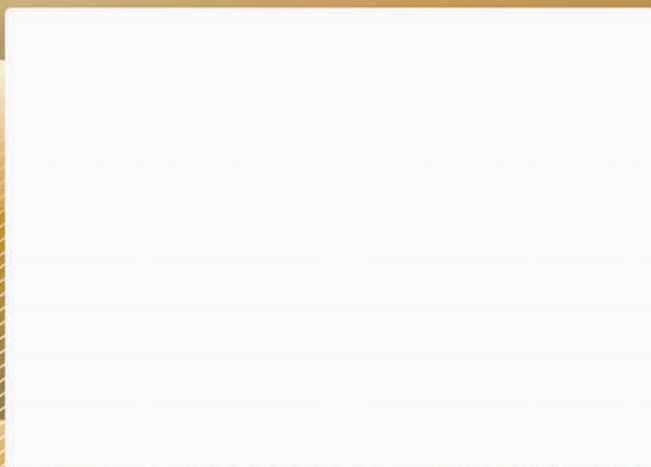

More than 20 different products are available in 10 different sizes to reply to all your needs, from hobby gardener to professional growers
